

Bluetooth™

The wireless connection.
Bluetooth™ PC Card.

- Bluetooth™ – cables get outclassed
- Connect up to seven devices simultaneously
- SPANworks software for spontaneous networking applications
- No line of sight between connected devices needed

Choose freedom.

TOSHIBA

When we try to go mobile we are very often held back by a tangled cluster of cables linking notebook, PDAs and other items of hardware. So, Toshiba engineers met with colleagues from Ericsson, IBM, Intel, Lucent, Microsoft, Motorola, Nokia and 3Com with one purpose in mind: namely, to fundamentally reinvent the way devices communicate with one another – at home and in the office. By making such communication wireless. The outcome is Bluetooth™ technology – a connectivity technology that opens up a world in which PCs, mobile phones, organisers and other electronic devices communicate with each other cable-free over distances of up to 100 meters (without power amplification 10 meters).

Bluetooth technology has redefined short-distance communication with the aid of a tiny radio module using the worldwide freely accessible 2.4 gigahertz short wave (ISM) band. This module allows users to dispense with a host of cables. Moreover, with SPANworks, the Bluetooth PC Card is an essential link in providing a spontaneous, seamless network over two or more notebooks (up to a total of 7). SPANworks consists of four applications: file utilities, presentation sharing, contacts and chat. One of its main benefits will be the effortless transferring of files – as simple as drag and drop. But it will also allow users to view the same presentation via a wireless connection within a piconet.

In addition, users will also be able to take advantage of wireless synchronization of data between organisers and PC and will be able to send and receive e-mails without having to connect their mobile phone to their notebook physically. And in a few years from now, tangled cables will have long been forgotten. Whether you want to control presentations remotely or hook up to the Internet via a mobile phone without a wire, the Toshiba Bluetooth PC Card is the option you'll need to get things started.

Part Number	PA3053E-1PCC
Format	PC Card type II
Transmission Range	up to 100 metres
Transmission Power	+20dBm Bluetooth radio designed in accordance with specification of the Bluetooth System v1.0B
Compatibility	Any notebook featuring a PC Card slot type II. Any Bluetooth product certified to Bluetooth specification v1.0B
Software Included	Bluetooth Neighbourhood Suite, SPANworks 2000.
OS Support	Windows 98 SE/ME (further OS support available soon)
Warranty	1 year
