Distinctive design meets advanced technology:
The Equium 2000 concept

A radical **new** approach to **PC technology.**

The Equium 2000 features a high-quality, super-flat 15" TFT LCD display, with all internal PC components integrated into an L-shaped case that serves as the base for the display. The result is a radically reduced footprint requiring minimal space on the desktop.

Yet despite its space-saving format, the Equium 2000 packs the sort of power you would expect from a conventional desktop PC, including a fast Intel Pentium III 650 MHz processor as well as abundant hard disk space to support the most demanding applications. Screen technology is equally impressive: graphics data is delivered from the PC unit to the screen via a direct digital link, ensuring superlative image quality, colour and contrast.

The best of **both** worlds.

With the Equium 2000, Toshiba has bridged the gap between notebook and desktop to create an entirely new breed of computer: one that redefines the future of personal computing. This remarkable PC draws on our many years' experience as a leading innovator, combining the best of both desktop and mobile technologies. In a class of its own, it delivers outstanding desktop performance as well as all the space-saving and practical benefits of a notebook.

From the high-quality 15" digital display and wireless keyboard and mouse to the notebook-size footprint and integrated carry handle, the Equium 2000 is a vision of the future, here today.

The 15" TFT colour display features a digital link to the PC unit for outstanding image quality.

Toshiba recommends Windows® 2000 Professional for business.

Rethinking the desktop: The Equium 2000.

The Equium 2000* combines the power of the desktop with the flexibility of the notebook in a single, stylish, all-in-one LCD PC. A desktop revolution from Toshiba.

Toshiba. Experience and innovation you can rely on.

The Equium 8000 series is the latest product of our many years' experience in desktop computing. Throughout that time, we've consistently been at the forefront of PC development. Our ongoing commitment to innovation has seen us regularly set new benchmarks for the industry, and become world market leader in mobile computing.

Wireless means freedom.

As well as an elegance that's certain to turn heads, the Equium 2000 is designed for the utmost practicality and ease of use. Visionary on-board technologies include a wireless mouse and wireless keyboard with additional audio and Internet keys, connected via a USB receiver on the base. By eliminating the need for cables and direct line-of-sight connectivity, this new-generation technology goes a long way to enhancing working flexibility.

Expect more.

As with every Toshiba computer, the Equium 2000 offers a range of versatile expansion and connectivity features. They include an integrated plug-and-play SelectBay slot for the bundled SelectBay CD-ROM drive. Or, depending on the job at hand, use the SelectBay slot to run SelectBay modules developed for our Tecra notebook range, such as a Zip drive, CD-RW drive or additional hard disk.

For greater flexibility, we've included a PCMCIA slot for two Type II or one Type III PC Cards, as well as an integrated Ethernet adapter for reliable network connectivity.

Both these notebook-derived technologies maximise performance and productivity while minimising space requirements.

A unique blend of design and technology, the Equium 2000 is ideal wherever space is at a premium. The ultimate status symbol in any office environment, it's also guaranteed to impress in call centres, point of sale and reception locations.

Vision becomes reality.

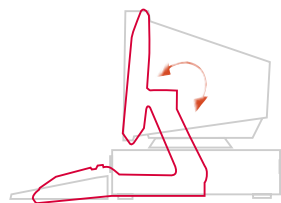

At Toshiba we have a vision of a totally new approach to personal computing. One that blends uncompromising performance with a footprint the size of a notebook. With the Equium 2000 we've turned that vision into reality, combining desktop and mobile technologies in a single stylish solution.

Far from being just a bold design experiment or style statement, the Equium 2000 is a revolutionary machine that sets a new benchmark for computing. The latest generation Equium 2000 takes the concept even further by incorporating even greater processing power, plus Toshiba's revolutionary USB wireless keyboard and mouse for maximum convenience.

*The information provided in this brochure applies only to the manufacturer's latest product range. Some information may not apply to older models from the Equium 2000 range. Please contact your Toshiba authorised reseller for details.

The wireless USB keyboard and mouse eliminate trailing cables and enhance working flexibility.

Compared with a conventional PC, the Equium 2000 takes up far less space on your desktop.

The infrared port (FIR) allows easy communication with peripherals.

Two USB ports are incorporated, each capable of connecting up to 127 peripheral devices. Both ports support hot plug-and-play, which means devices can be plugged and unplugged without having to shut down the computer.

The Equium 2000 also uses the latest notebook technology to provide a flexible solution for today's increasingly mobile working environment. It measures just 350 x 212 x 389 mm and weighs a mere 5.8 kg. So with its integrated carrying handle, and slot for the keyboard between the display and base, moving to another desk or workplace couldn't be simpler or safer.

A wide range of interface options, such as USB ports and an Ethernet adapter, ensure investment protection.

The standard SelectBay CD-ROM drive can easily be swapped for other SelectBay modules.

Slots for two Type II PC Cards and one Type III PC Card allow more expandability options.

Innovative technologies. Year on year, Toshiba invests more than six per cent of total revenue in research and development. This ongoing commitment to improvement means our customers are always guaranteed the latest in PC technology.

Reliable build quality. When we develop a new PC, we must be convinced it offers genuine benefits for our customers. Rigorous testing ensures that every PC we build not only fulfils all user requirements now, but will continue to do so for years to come.

Intelligent design. At Toshiba, we believe that the exterior design of a product is an important and integral part of the user interface. The principal design criteria for every new product are therefore maximum functionality, comfort and ergonomic benefits for the user.

Generous warranty. It takes real confidence in your products to offer the lengthy and comprehensive warranties that we do. And even if you feel you'll never need one, it's still good to have the peace of mind that comes from choosing Toshiba.

Authorised reseller network. Specialist backup is essential when using equipment such as a PC. Which is why we've developed an extensive network of authorised resellers and qualified service providers to ensure you receive all the advice and support you need.

Award-winning PCs. What's the secret of building award-winning PCs? Sometimes it seems as if having the Toshiba logo is enough. As a regular recipient of independent awards from specialist publications and users around the world, we could be forgiven for resting on our laurels occasionally. The secret is, we never do.

Toshiba recommends Windows® 2000 Professional for business.
