The Equium 8000 series:

Intelligent solutions for a stable IT environment.

The Equium 8000* series combines the very latest PC technology with a cost-efficient, ultra-flexible and future-proof PC platform designed for every type of user and organisation.

Minimising Total Cost of Ownership.

Toshiba's Equium 8000 concept is designed around three core principles: performance, flexibility and cost-efficiency. Each series offers the same outstanding features, such as the latest processors and powerful technology to support the most dynamic applications. You'll also find outstanding flexibility to meet every requirement of the modern PC environment. And the concept incorporates all the essential features for reducing long-term Total Cost of Ownership (TCO) in an increasingly competitive world:

- Shared platform and common components for long-term stability and easy evaluation
- Easier access to all interior components for fast upgrades and maximum availability
- Comprehensive manageability features for easier network administration
- Modular, future-proof architecture to support tomorrow's technologies
- Wide range of configuration options to suit individual users and applications

* The information provided in this brochure applies only to the manufacturer's latest product range. Some information may not apply to older models from the Equium 8000 range. Please contact your Toshiba Authorised Reseller for details.

Long-term stability.

Today's computers need the functionality to deal with increasingly demanding IT environments, and they also have to deliver it in cost-effective formats. Toshiba's answer is to combine long-term platform stability with outstanding performance and flexibility.

The common architecture across the Equium 8000 platform ensures significantly longer product lifecycles to provide greater protection for your IT investment. Processors, hard drives, memory modules and peripherals, for example, can all be upgraded quickly and easily throughout the network, often without the need to reconfigure system software. This means less pressure to invest in new systems, helping to increase the life expectancy of your PCs.

You can rely on Toshiba to ensure maximum continuity for your IT infrastructure, at minimum TCO for your business.

Enhanced serviceability and manageability.

Easier servicing and efficient manageability help to reduce the cost of running a PC network.

All three form factors of the Equium 8000 series feature innovative chassis that ensure easy access to interior components, enabling faster upgrades and replacements. Benefits include shorter service times and therefore greater system availability, as well as lower overheads for your budget.

All Equium 8000 concept models also come with a full range of integrated manageability features that enable centralised administration of all systems over a network.

Intel® LANDesk Client Manager

- Provides up-to-the-minute information on every client desktop on the network
- Tracks critical hardware and software components
- Monitors PC health and ensures early detection of potential problems
- Minimises administration workload and ensures maximum system availability

Wake-on-LAN

- Enables system administrators to boot a client PC from a remote location
- Troubleshoot problems or perform upgrades remotely
- Frees up time for more important administration tasks

Other advanced features include BIOS Asset Tagging for identifying PCs, SecureSleep™ to minimise energy consumption, and ACPI device power management.

Equium 8000 concept models are available in three form factors to suit different business requirements; with its full-size chassis, the Equium 8000D offers uncompromising performance and expandability.

Versatile Equium 8000S series models are available in a slimline chassis providing easy access to interior components.

The amazingly compact Equium @8000 series ensures maximum flexibility and ultimate space-saving on the desktop.

The Equium @8000 series:

The ultimate space-saving solution.

With its powerful functionality and innovative compact format, there's room for Equium @8000 in any business environment.

More room, more flexibility.

The remarkable Equium @8000 combines the practical advantages of a notebook PC with all the latest desktop features. The result is a smart and superbly flexible option within the Equium 8000 corporate platform concept, ideal wherever space is at a premium.

As with the Equium 8000S and Equium 8000D series, the Equium @8000 is designed to safeguard IT investment and reduce TCO. So it features a shared software image and common components for long-term stability and easy evaluation.

It's also extremely flexible, allowing you to keep pace with changing business objectives. For example, as an alternative to a standard CRT or TFT monitor, the Equium @8000 provides the option to directly attaching a 15" or 17" TFT display via the LCD Stand Kit to ensure maximum space-saving on the desktop.

You can easily upgrade the main and video memory, and plug in USB devices such as a floppy drive, modem or WiFi™ via four USB ports – two at the front and two at the back. And when it comes to expansion, select a standard desktop drive or, for greater versatility and cost-efficiency, share your standard Tecra notebook SelectBay devices with your new Equium @8000 PCs.

Serviceability is outstanding too, with an easy access door providing fast access to peripherals. All in a stylish, compact chassis that looks good in high-profile locations or the smartest office environment.

Key benefits

- Smart, space-saving chassis – takes up minimum space on the desktop
- Enhanced monitor management with optional LCD Stand Kit offering the chance to attach up to 17" TFT display
- RAM and video memory easily expandable
- Choice of standard 5.25" desktop drives or notebook SelectBay drives via SelectBay adapter
- Easy access front door to different peripherals such as CD-/DVD-/CDRW-/DVD-ROM drive

Innovative LCD Stand Kit gives you the option to attach up to 17" TFT monitor to the side of the PC.

The Equium 8000S series:

Unique architecture for greater flexibility.

Easy servicing and impressive reliability make the Equium 8000S series ideal for any business.

Compact design with easy serviceability.

The Equium 8000S has all the features essential for any business to protect financial investment – cost-effective upgrading, platform stability, simple manageability and a proven high-speed support network.

Then there are the other important extras, such as easy serviceability. The chassis features Toshiba's Innovative Front Drawer Architecture, designed to open at the push of a button to provide access to interior components. There's no need to move the monitor, so the hard disk drive or memory

can be upgraded with minimal disruption to the user's environment. And removable items are colour-coded to make maintenance more straightforward.

The Equium 8000S also features an ultra-efficient cooling system in the form of a unique air duct. This means that the fastest Intel® Pentium® III processors can be incorporated into the slimline chassis with no danger of overheating.

You'll also find a range of expansion slots for added functionality, while a choice of configurations means the Equium 8000S series can be customised to meet the needs of users throughout the organisation.

Key benefits

- Ingenious Front Drawer Architecture for fast and easy access to all interior components without moving the monitor
- Compact chassis with slim-type CD-ROM or DVD-ROM drive
- Low Total Cost of Ownership thanks to easy integration and low-cost upgrades
- Comprehensive range of manageability features

Front Drawer Architecture provides fast access to all interior components without moving the monitor.

Slim-type CD-ROM and DVD-ROM drives contribute to the compact chassis.

The hard disk can be upgraded or replaced with minimal interruption and no need for tools.

The Equium 8000D series:

Built with the future in mind.

When uncompromising power, performance and enhanced expandability are key considerations, the Equium 8000D series is the ideal choice.

Easy expansion to meet changing needs.

Toshiba's Equium 8000D series is perfectly equipped to meet the requirements of the most demanding corporate environment – both now and well into the future.

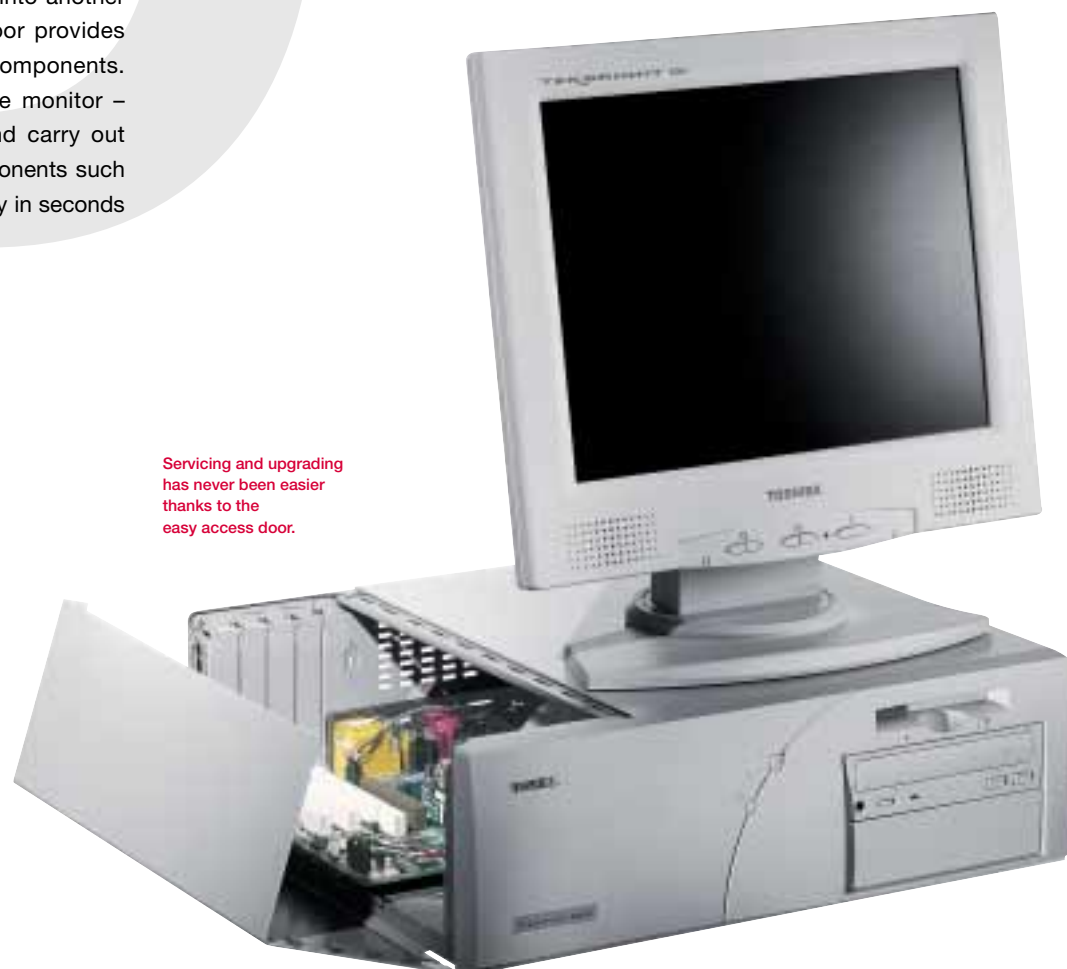

Models are available with a full-size chassis offering maximum potential for expandability as needs change. The Equium 8000D is also designed to take serviceability into another dimension. An easy access door provides instant access to all interior components. There's no need to remove the monitor – simply open the end panel and carry out maintenance, or upgrade components such as the hard disk drive or memory in seconds without using tools.

Key benefits

- Full-size desktop chassis for maximum expandability
- Easy access door for fast access to all interior components
- Integrated CD-ROM and DVD-ROM drives on request, plus extra 5.25" slot for installing an additional drive
- Comprehensive manageability features simplify network administration

Colour-coded interfaces take the guesswork out of attaching peripherals to the Equium 8000 series.

Servicing and upgrading has never been easier thanks to the easy access door.

Experience and innovation you can rely on.

The Equium 8000 concept is the latest solution of many years' experience in desktop computing. Throughout that time, we've consistently been at the forefront of PC development. Our ongoing commitment to innovation has seen us regularly set new benchmarks for the industry.

Innovative technologies. Year on year, Toshiba invests more than six per cent of total revenue in research and development. This ongoing commitment to improvement means our customers are always guaranteed the latest in PC technology.

Reliable build quality. When we develop a new PC, we must be convinced it offers genuine benefits for our customers. Rigorous testing ensures that every PC we build not only fulfils all user requirements now, but will continue to do so for years to come.

Intelligent design. At Toshiba, we believe that the exterior design of a product is an important and integral part of the user interface. The principal design criteria for every new product are therefore maximum functionality, comfort and ergonomic benefits for the user.

Generous warranty. It takes real confidence in your products to offer the lengthy and comprehensive warranties that we do. And even if you feel you'll never need one, it's still good to have the peace of mind that comes from choosing Toshiba.

Authorised reseller network. Specialist backup is essential when using equipment such as a PC. Which is why we've developed an extensive network of authorised resellers and qualified service providers to ensure you receive all the advice and support you need.

Award-winning PCs. What's the secret of building award-winning PCs? Sometimes it seems as if having the Toshiba logo is enough. As a regular recipient of independent awards from specialist publications and users around the world, we could be forgiven for resting on our laurels occasionally. The secret is, we never do.
